

**WORLD'S
GREEN LUNGS**

CERTIFICATE

Jakub Vagner
adopts 7 trees of the endangered tropical virgin forest in the province of Maniema in
the Democratic Republic of Congo for the period of 10 years. By doing so, Jakub protects
the home of endangered animals and plants and thus contributes to the improvement
of the living conditions of local inhabitants.

By saving the most endangered tropical virgin forests, Jakub helps mitigate global climate
change. The operations saving the endangered tropical virgin forest is realized through the
mediation of the AgroForestry reforestation project.

The Project involves:

- › planting new forests
- › reclamation of degraded lands used for food production
- › building infrastructure, schools, and health care centres

All activities are realized with the active participation
of local inhabitants.

Ing. František Nekovář
